VDO

Speed Alert

Save confusion. Drive safely

With speed limits ranging from 40 to 110 kmph, it's easy to get confused or forget how fast you are travelling. VDO Speed Alert is designed to warn you when you go over the designated speed limit.

It is so easy to use, press the arrow keys until the LCD screen displays your desired speed limit, or simply press the "SET" button for current speed. Re-set at any time at the touch of a button. It's that easy!

Unit is designed to operate off a speed signal source, if not available on vehicle with mechanical speedo, use speed sensor part no. 412.009 Kit

New features include:

- Dual voltage (12V & 24V).
- A switched output to drive external buzzer or lamp.
- Headlights left on alarm.

Part no. 124.130
