PREMIUM QUALITY FOR ALL BOATS

OUTDOOR INSTRUMENTATION ENGINEERED IN SWITZERLAND

LEADING SOLUTIONS FOR DEMANDING INSTRUMENTATION

We originate from VDO Marine instruments – the first choice in the Marine business. You can expect even more from Veratron. With more than 45 years experience developing robust designs for the marine, power sports, automotive and industry markets, you can rely on us to provide product performance that is technically outstanding. Since the beginning, our team has been responsible for

the development, production and sales of all the VDO Marine products. This solid foundation has allowed us to continue developing world-leading instrumentation under our new name, Veratron. Our knowhow – alongside a passionate and experienced team, combined with an automotive background – ensures outstanding quality in all areas.

MADE FOR EXTREME

VDO Marine has supplied solutions for pleasure boats, yachts and sailing boats since 1958. In 2018, Veratron was established and took over the existing team, having produced VDO Marine products since 1972. The DNA stays and the team is ready to develop under the name Veratron Marine, to produce even better products for the future.

The highest precision and the use of pioneering technologies have always been as important to us as the ease of use and attractive design for all our Marine products. To ensure total reliability – even under the toughest conditions – all our products undergo extensive testing and quality assurance procedures.

A PARTNER YOU CAN RELY ON

Veratron was established in 2018 to serve its customers with high quality, cost competitive products. With more than 45 years of know-how in our company, we provide the market with premium instruments for vehicles. Our customers know us for our short time to market from development to start of production and reliable supply. We have all competences on board to deliver high value solutions from first sketches to final product.

OUR HISTORY

The name has changed several times, but many of the people developing our first-class instruments have been with us since the beginning. More than 45 years' experience and knowhow have been accumulated within Veratron, allowing us to provide the market with cutting edge technology and premium instruments for vehicles of all kinds.

1972 – 1991 FOUNDATION & GROWTH

1972

Foundation of VDO Technik AG at new production plant in Rüthi, Switzerland. Production of passenger car instrument clusters for Swedish car manufacturer, as well as speedo and tachometers for Austrian motorcycle and car manufacturers.

1975

First production of mechanical speedometers for bicycles, mechanical fuel level sensors and gauges.

1979

The production of central door locking systems for two major German car manufacturers begins.

1986

Focus on production of bi-metal instruments for all German car manufacturers. New production processes implemented to produce up to 25 000 units per day.

1989

Expansion of facility and integration of marine business.

1992 – 2001 DIVERSIFICATION

1992

Start of PCB assembly in Rüthi, Switzerland.

1998

Production of instruments for British off-road vehicle manufacturer.

1999

Engine monitoring instrument for the biggest US outboard engine manufacturer – first development and production of color display for Marine application.

2001

ATV instrument – first development for off-road application.

2002 – 2007 CHANGE

2002

First system solutions for industrial applications developed and produced.

2004

Instrumentation for larger US construction machineries manufacturer developed and produced.

2005

Icon motorcycle manufacturer in the US orders first instruments in Rüthi.

2006

Start of production of fuel level sensors for trucks.

2007

Production plant refreshed and made ready for further expansion.

2008 - 2017 NEW OPPORTUNITIES

2008

Production of tractor instrument clusters starts.

2010

Up to date 2 million instruments were delivered to US motorcycle manufacturer.

2013

The biggest marine engine manufacturer becomes the first Japanese customer to order from the Rüthi plant. Two new European premium motorcycle brands follow.

2014

Rüthi becomes the Marine market group within Continental. Further focus on marine instruments.

2017

A famous Japanese engine, motorcycle and car manufacturer is added as the next important customer in the marine segment.

2018 ONWARD

2018

The management being partly on board for over 20 years buys the Marine and PA Business from Continental and founds the new company Veratron.

2019

Development of premium and cutting edge Veratron products. Ongoing development and production of VDO Marine products.

ACQUALINK™ – TIMELESS INSTRUMENTS HIGH-QUALITY DESIGN

ACQUALINK™ REALIZES STATE OF THE ART SOLUTIONS TO PROVIDE CUSTOMERS WITH INSTANTANEOUS, ACCURATE NAUTICAL INFORMATION.

The instruments are designed for performance, whereas ease of use remaining an important attribute. The use of solely premium material, such as mineral glass lenses, guarantees the highest level of reliability and readability, as well as low energy consumption. All AcquaLink™ instruments are lead-free, a token of our commitment to environmental responsibility. In line with

this, our production plant is ISO 14001 and ISO 9001:2015 certified. In addition, the timelessly elegantly stylish yet modern design of AcquaLink™ displays and gauges provides your cockpit with pleasant clarity. Every component of the AcquaLink™ series fulfills highest standards with regard to functionality, design and quality.

low power consumption
lead-free instruments

BENEFITS OF USING ACQUALINK™:

- Maximum precision and deployment of pioneering technologies are equally important as the ease of use and stylish design.
- All AcquaLink™ components are made of high class materials, like mineral glass, stainless steel and aluminum.
- All products are manufactured under ISO 9001 certified environment.
- Our plug and play solution design concept offers a high level of installation flexibility.
- We ensure seamless integration and optimum utilization of AcquaLink™ devices for extreme conditions at sea.
- Harmonized dashboard look.

NavControl

4.3" TFT Display

MAST DISPLAY UNITS

The new Veratron mast brackets are an elegant and efficient solution for mast installation. They hold either one (portrait mode) or three (landscape mode) 7" TFT displays and a rear cover is available with minimum installation space thanks to the AcquaLink™ daisy-chain between displays. Thanks to the easy touch-based interaction to setup the pages, the TFTs can display up to 16 data, such as wind, speed, depth but also battery voltage and distances.

The Mast Display functionality is implemented in all 7" AcquaLink™ TFTs.

- Landscape and Portrait orientation
- Automatic detection of AcquaLink™ NavBox to self configure as Mast Display

Technical specifications:

- as AcquaLink™ 7" TFT Displays
- IPS technology display
- High readability
- NMEA 2000® compatible
- IP67 exposed
- Touch screen with swipe function
- Touch buttons
- Operating temperature range design for -30 °C to +80 °C

AFTERMARKET PACKAGING:

Triple: Carbon Bracket (B00028501), 3x 7" AcquaLink™ Displays with Black Bezel and Silicone Cover, NMEA 2000® Adapter Cable, Terminator, Cables.

Single: Aluminium Bracket, 1x 7" AcquaLink™ Display with Black Bezel and Silicone Cover, NMEA 2000® Adapter Cable, Terminator, Cables.

TFT DISPLAYS

AcquaLink™ multifunction TFT Displays are available in 4.3" and 7" sizes. The full 24 bit /16 m colors optically bonded IPS technology displays feature transmissive layer technology for unprecedented and unsurpassed readability even in direct sunlight. The TFT Displays show a wide array of data received from the AcquaLink™ NavBox or NMEA 2000®. Users can customize up to 40 different data pages with single, double, triple or quadruple grid layouts.

The Displays can be daisy-chained with other AcquaLink™ gauges, displays or NavControls using the unique VDO Marine Bus or directly connected to the NMEA 2000® backbone (optional adapter cable required) for simple installation on any yacht.

7" TFTs are equipped with capacitive multi touch screens to slide between pages whereas 4.3" displays require the use of a NavControl unit for data input and operation.

- 4.3": 1x plug with 2x Video Input
- 7": 2x plugs with 4x Video Input
- 2x VDO Marine Bus connectors
- Operating temperature range -30 °C / +80 °C
- Protection level front and rear IPX9K with connectors plugged

AFTERMARKET PACKAGE:

TFT Display, Black Bezel, Silicone Cover, Mounting Screws, Drilling Template, Installation Instructions, Safety Instructions.

Optionally white bezel can be selected from the accessories page 72.

NAVCONTROL

The NavControl can assume control of any TFT Display connected to the VDO Marine Bus or NMEA 2000® network. Even multiple units can be connected to the same Bus without conflicts.

- Compatible with AcquaLink™ and OceanLink™
- 2x VDO Marine Bus connectors
- Operating temperature range -30 °C / +80 °C
- Protection level IPX6
- Reverse polarity protection
- Telltales light indication

AFTERMARKET PACKAGE:

NavControl, Black Bezel, Silicone Cover, Mounting Screws, Drilling Template, Installation Instructions, Safety Instructions.

Optionally white bezel can be selected from the accessories page 72.

ACQUALINK™ 110 MM GAUGES

AcquaLink™ 110 mm Gauges feature anti-fog coated mineral glass lenses and LED backlight technology. This allows superb readability in every situation. The gauges can be daisy-chained, using the unique VDO Marine Bus connection or connected to the NMEA 2000® network (optional adapter cable required). The available information provided by the AcquaLink™ NavBox or the NMEA 2000® network is indicated by the pointer movement. The AcquaLink™ Tachometer can master up to 16 additional AcquaLink™ 52 mm Gauges. These gauges can be connected using the patented EasyLink serial bus.

SPECIFICATIONS:

- 2x VDO Marine Bus connectors
- Current consumption <150 mA
- Reverse polarity protection
- Anti-fog coated mineral glass lens
- Protection level IPX6
- Operating temperature range -20°C/+70°C

AFTERMARKET PACKAGE:

Gauge, Bezel, Rubber Seal, Spinlock, Drilling Template, Installation Instructions, Safety Instructions.

WIND

The VDO Marine Wind Gauges display wind speed and angle information received from the VDO Marine AcquaLink™ NavBox or the NMEA 2000® data bus.

RANGE	VOLTAGE	COLOR	ARTICLE NUMBER

110 mm Apparent Wind Speed 50 knots

TACHOMETER

The VDO Marine Tachometer displays RPM information received from the VDO Marine AcquaLink™ NavBox or the NMEA 2000® data bus and distributes additional engine information to optional 52 mm AcquaLink™ EasyLink Gauges. With AcquaLink™ Tachometers you may monitor up to 4 boat engines via NMEA 2000® or J1939. Easily assign the dedicated engine to the chosen gauge by using VDO Marine Configuration tool or by a connected TFT Display.

ACQUALINK™ 52 MM GAUGES

AcquaLink™ 52 mm Gauges are connected directly to any AcquaLink™ 110 mm Tachometer using the patented EasyLink serial bus connection. Up to 16 EasyLink gauges for each Tachometer can be daisy-chained together.

Giving the customer the possibility to customize the cockpit, AcquaLink™ 52 mm Gauges have not included bezel in the packaging. Bezels available are listed in the Accessories section page 72.

SPECIFICATIONS:

- AMP Superseal Easylink connector
- Current consumption <100 mA
- 270° pointer deflection angle
- Reverse polarity protection
- Anti-fog mineral glass lens
- Protection level IPX6
- Operating temperature range -20 °C/+70 °C

AFTERMARKET PACKAGE:

Gauge, Rubber Seal, Spinlock, Drilling Template, Installation Instructions, Safety Instructions.

NAVBOX

The AcquaLink™ NavBox is the core of the AcquaLink™ VDO Marine system. It acts as a CPU and signal interface. The NavBox provides a wide range of digital and analog input possibilities. It supports up to four electronic engines (J1939 or NMEA 2000®) or one analog engine. It also features two VDO Marine Sumlog™ paddle wheel sensor and one analog VDO Marine Wind Sensor connections, so legacy VDO Marine products can be used and brought to the digital age.

NAVBOX READS FOLLOWING ANALOG DATA:

- Engine Oil Pressure
- Engine Oil Temperature
- Engine Coolant Temperature
- Transmission Oil Pressure
- Fresh Water, Waste Water and Fuel Level
- Voltage
- Rudder Angle
- Engine Frequency
- Battery Current
- Amperemeter

NavBox

It also features a NMEA 0183 input and output port as well as a buzzer output. All the data received are converted and sent to the NMEA 2000® network and to the VDO Marine Bus. This gateway function allows displaying engine, liquid level, pressure, temperature and other vital information on any compatible display on the NMEA 2000® network or on designed VDO Marine AcquaLink™ devices.

The configuration of the NavBox can be done by using either an AcquaLink™ TFT and NavControl or by using the intuitive VDO Marine configuration tool.

- Reverse polarity protection
- NMEA 2000® certified
- LED signal status indication
- Aluminum base plate
- Front & rear side protection rating IPX4
- 3x VDO Marine bus lines
- 1x J1939 CAN bus
- 1x NMEA 2000® bus
- 1x VDO Marine Analog Wind Sensor Input
- 2x VDO Marine Sumlog™ Inputs
- AMP Super Seal power input
- 26 pin AUX input (analog signals, NMEA 0183)
- Operating temperature range -20 °C / +70 °C

AFTERMARKET PACKAGE:

NavBox, Power cable & fuse, 26 pin harness with USB interface termination resistors (3 pc.), Mounting Screws, Safety Instructions, Installation and Operation Manual, Drilling Templates.

OCEANLINK™ – PRECISION CAN INSTRUMENTATION FOR LEISURE BOATS

THE OCEANLINK™ SERIES FOCUSES ON THE NEEDS OF THE MODERN SPORTS AND LEISURE BOATS MARKET.

It provides a modular instrumentation concept for electronic navigation and engine monitoring with NMEA 2000®, J1939 and analog connectivity. The new product line offers a wide range of functions as well as great flexibility in installation and design.

The OceanLink™ series provides three different master instruments as centerpieces of the system: a 4.3" TFT Display, a 7" TFT touch Display and as master instruments 85 mm round gauges. All devices are information

powerhouses, multifunctional tachometers and have embedded Gateway from Analog or J1939 to NMEA 2000®.

The OceanLink™ 85 mm Master gauge and the TFT Displays show various available data (e.g. engine data, depth, course over ground and speed over ground), and send it to all NMEA 2000® devices and to up to 16 additional satellite instruments. All instruments come in a new and stylish design, with perfect to read modern dials.

BENEFITS OF USING OCEANLINK™:

- Easy and effective use.
- Perfectly readable engine monitoring thanks to increased performance presentation.
- The EasyLink data connection and the plug & play solution provide a flexible installation of panel, front and flush mounted instruments.
- Decades of experience guarantee a fully reliable, modern navigation and engine monitoring system with NMEA 2000®.
- A solid housing design completely sealed against dust and highly water resistant (IPX7 front and rear).
- High quality precision instruments designed in Switzerland.

FURTHER ADVANCED FEATURES:

- Master instruments with NMEA 2000® gateway functionality forwarding data, e. g. engine data, to NMEA compatible devices.
- Sunlight readable touch screen IPS TFT Display.
- GPS Speedometer, 85 mm, features NMEA 2000® port, which bridges the position, COG, SOG data to the NMEA 2000® network.

OCEANLINK™ TFT DISPLAYS

TFT DISPLAYS

The new OceanLink™ 2.2", 4.3" and 7" multifunction TFT Displays feature a full 24 bit / 16m colors optically bonded display with IPS technology for perfect readability even in direct sunlight. The TFT Displays show and distribute a wide array of data received from NMEA 2000® and J1939 CAN Bus systems and analog sensors directly connected to the display. Users can customize different data pages with single, double, triple or quadruple grid layouts.

OCEANLINK™ 2.2" TFT DISPLAY*:

- Plastic front lens
- Front & rear side protection rating IPX7
- NMEA 2000® interface
- Bluetooth 5.1 Low Energy ready
- 1x NMEA 2000® or J1939
- 1x EasyLink data output
- 2x Analog inputs
- 1x Frequency input
- 1x Programmable alarm output 500 mA
- Operating temperature range -30 °C / +80 °C

OceanLink™ 2.2" TFT Display

OCEANLINK™ 4.3" TFT DISPLAY:

- Optical bonded mineral glass lens
- Front & rear side protection rating IPX7
- 1x NMEA 2000® connector
- 1x J1939
- 2x 4 – 20 mA inputs
- 2x Analog inputs
- 1x Frequency input
- 1x EasyLink data output
- 1x Programmable alarm output 500 mA
- Operating temperature range -30 °C / +80 °C

OceanLink™ 4.3" TFT Display

OCEANLINK™ 7" TFT DISPLAY:

- Touch screen function
- Optical bonded mineral glass lens
- Front & rear side protection rating IPX7
- 1x NMEA 2000® connector
- 2x J1939
- 6x Analog inputs
- 2x Frequency inputs
- 2x 4 – 20 mA inputs
- 3x Digital inputs or 0 – 5 V
- 2x Alarm outputs
- 2x Video inputs
- 2x EasyLink data outputs
- 2x Programmable alarm outputs 500 mA
- Operating temperature range -30 °C / +80 °C

OceanLink™ 7" TFT Display

* The 2.2" TFT Display uses TN technology

**AFTERMARKET PACKAGE:**

TFT Display, Bezel, Silicone Cover (4.3" and 7"), Mounting Screws, Wiring Harness, Installation Instructions, Safety Instructions.

OCEANLINK™ 85 MM – MASTER GAUGES

OceanLink™ Gauges have a white and black dial version, which is always completed with a bezel in identical color. Optionally, a Chrome Bezel is available as a decorative accessory.

SPECIFICATIONS:

- 1x NMEA 2000® input
- 1x J1939
- 1x Frequency input
- 2x Analog inputs
- 1x Alarm output 500 mA
- Reverse polarity protection
- Anti-fog double layer plastic lens
- Protection rating IPX7
- Operating temperature range -20°C/+70°C

AFTERMARKET PACKAGE:

Gauge, Bezel, Rubber Seal, Spinlock, Connection Cable, Installation Instructions, Safety Instructions.

GPS SPEEDOMETER

The new OceanLink™ GPS Speedometer features an embedded GPS antenna, an inverted dot matrix LCD and NMEA 2000® connectivity. Up to twenty 52 mm satellite gauges can be connected thanks to the integrated EasyLink connectivity.

DISPLAYED DATA:

Heading, Depth, Seawater Temperature, Boat Speed, SOG, Date & Time, Battery Status, Air Temperature, Engine Oil Pressure, Fuel Level, RPM, Coolant Temperature, Transmission Gear Temperature, Fresh Water Level, Waste Water Level, Trim, Engine Hours, Rudder Status, Booster Pressure, COG and alarms.

TACHOMETER

The new OceanLink™ Tachometer automatically presents all the key boat data on dot matrix digital display. Besides a CAN interface with NMEA 2000® certified and SAE J1939 data protocol it features two digital and one analog inputs. The innovative EasyLink data connection makes the installation easy and cost effective. Satellite instruments for further dynamic measurement values receive updates from the central instrument every 20 msec.

OceanLink™ is available in various designs and a number of bezel color options. The instruments can also be conveniently integrated into customer-specific panel solutions.

The VDO Marine Tachometer displays all important engine related data and distributes it to up to sixteen 52 mm satellite gauges.

OCEANLINK™ 52 MM GAUGES

OceanLink™ 52 mm Gauges are connected directly to any OceanLink™ Master unit using the patented EasyLink serial bus connection. Up to 16 EasyLink gauges for each Tachometer or GPS Speedometer can be daisy-chained together. OceanLink™ Gauges have a white and black dial version, which is always completed with a bezel in identical color. Optionally a Chrome Bezel can be selected from the accessories list on page 72.

SPECIFICATIONS:

- AMP Superseal Easylink
- Current consumption <100 mA
- 270° pointer deflection angle
- Reverse polarity protection
- Anti-fog double layer plastic lens
- Front & rear protection rating IPX7
- Operating temperature range -20 °C/+70 °C

AFTERMARKET PACKAGE:

Gauge, Bezel, Rubber Seal, Spinlock, Installation Instructions, Safety Instructions.

EASYLINK FLEX

All the gauges in one gauge! The EasyLink Flex satellite can be wireless programmed via NFC interface directly from your smartphone to display your preferred single data onto its high-performance 1.44" TFT display.

VIEWLINE – EASY TO INSTALL, EASY TO CUSTOMIZE, EASY TO USE

VIEWLINE OFFERS A COMPREHENSIVE MODULAR, MODERN SERIES OF INSTRUMENTS FOR ENGINE MONITORING.

More functions and greater flexibility in installation and design increase the scope for high manufacturing standards and guarantee the highest level of reliability and readability. As the result of ongoing research and development work, we offer an innovative,

comprehensive standard instrumentation platform which is also available for outboard engine use. ViewLine provides maximum freedom to customize the cockpit and is the natural choice for an attractive price / performance ratio.

BENEFITS OF USING VIEWLINE:

- Anti-fog plastic double lens, maximum precision and stylish design with choice of nine various bezels.
- Our plug and play solution design concept offers a high level of installation flexibility for panel, front and flush mounted instruments.
- ViewLine offers maximum freedom in respect of cockpit customization.
- We ensure seamless integration and optimum utilization of ViewLine devices for extreme sea conditions.

VIEWLINE 110 MM GAUGES

ViewLine accessories bezel concept offers true design flexibility in the layout of instrument panels. The three attractive designs in black, white and chrome are suitable for every machinery instrument panel or special vehicle cockpit.

Based on the ViewLine housing concept, the cluster provides an ideal IP protection class, a modern appearance and high quality standards.

It provides many parameters in NMEA 2000® and there are several customization opportunities to meet specific customer demands.

AFTERMARKET PACKAGE:

Gauge, GPS speed cable, Bezel, Pushbutton for mode and configuration, Rubber Seal, Spinlock, Drilling Template, Installation Instructions, Safety Instructions.

GPS SPEEDOMETER

SPECIFICATIONS:

- Embedded GPS antenna
- Robust and flexible design for versatile applications
- CAN capability (NMEA 2000®)
- Pointer for analog indication of Speed over Ground (SOG)
- Programmable speed alarm
- Fixed segment LCD
- Flush mount possibility
- Front side protection rating IP67
- Compass for Course over Ground (COG)
- Clock
- 110 mm installation diameter
- 126 mm outer diameter
- 50 mm installation depth
- Reverse polarity protection
- 1x Telltale generic alarm
- 1x Telltale alarm (knots/kmh/mph)

DISPLAYED DATA:

GPS signal quality, Course over ground (COG), UTC time (optional with external push button), Trip distance (optional with external push button), Trip time (optional with external push button)

VIEWLINE 85 MM GAUGES

The VDO Marine ViewLine 85 mm Gauges are available in black or white dial versions, which are always completed with a round bezel in identical color. ViewLine accessories bezel concept offers true design flexibility in the layout of instrument panels. The three attractive designs in black, white and chrome are suitable for every machinery instrument panel or special vehicle cockpit.

SPECIFICATIONS:

- 8 and 14 pole Tyco/Hirschmann bush housing
- Operating voltage 8 – 32 V
- Accuracy +/- 2.5 % of full scale reading
- <175 mA current consumption with an LED warning light as standard

- Number of pulses programmable via dip switch or PC software (ViewLine programming tool)
- Anti-fog double lens
- Protection rating front IP67, rear IP52
- 85 mm installation diameter
- 50 mm installation depth
- Operating temperature range -20 °C / +70 °C

AFTERMARKET PACKAGE:

Gauge, Bezel, Rubber Seal, Spinlock, Connection Cable, Installation Instructions, Safety Instructions.

BATTERY STATUS

The ViewLine 52 mm Ammeter shows the level of current being drawn and the current supply on a clearly readable dial. The shunt (a measurement resistor) can be inserted into the measurement point in a matter of seconds. The voltmeter displays the status of generator and battery and their loads on a voltage scale. Values exceeding the normal charging voltages can therefore be monitored exactly. Even potential deep discharges can be detected.

VESSEL STATUS

The ViewLine rudder angle instrument for wheel-controlled yachts and pleasure boats displays the current rudder position at all times. This indicator makes it easier to navigate out of harbors or through locks. The gauge is available in 52 and 85 mm installation diameters. Only rudder instruments of the same diameter can be combined.

NMEA 2000® PRODUCTS

MEDIABOX

The VDO Marine MediaBox can be mounted literally everywhere on the boat. Listen to radio and weather forecasts with its built in AM/FM Tuner or connect a MP3 player via USB or Bluetooth smartphone to enjoy your favorite music. The MediaBox is NMEA 2000® certified and can be used with the VDO Marine AcquaLink™ and OceanLink™ TFT Displays. Additionally VDO Marine offers a free VDO Marine MediaBox App for your smartphone so that the MediaBox can be used as a stand-alone radio.

- AM/FM radio tuner with RDS
- Bluetooth audio player with 50 m range
- USB input
- Equalizer with volume control
- Power amplifier 4x 28 W (D class)
- NMEA 2000® certified
- IPX5 protection rating
- Operating temperature range -20 °C / +70 °C
- Free VDO Marine MediaBox App

ENGINEBOX

The EngineBox expands the possibilities of the NavBox for multi-engine applications or can be used as stand-alone when navigation information is not required. The EngineBox has a NMEA 2000® and a J1939 CAN port. The EngineBox can also be used on older, completely analog engines, thanks to the analog input ports provided and designed for RPM data, resistive sensors and capacitive sensors.

The EngineBox is available in 2 versions: Single Engine and Dual Engine. The Dual Engine version is designed with doubled frequency and resistive inputs. It allows for a simplified installation wiring within minimized required installation space, therefore reducing the commissioning time.

The EngineBox has to be set up using an intuitive PC configuration tool making it easy for programming the inputs (delivered free of charge). Thanks to the ISO 8846:1990 compliance, the EngineBox is also designed to be installed in engine compartments.

- Analog to NMEA 2000® gateway
- J1939 to NMEA 2000® gateway
- 2 Models for single engine and dual engine configurations
- Compact design
- Status LED
- Operating temperature range -40°C/+85°C

- 1x J1939 (2x J1939 Dual Engine)
- 1x M12 5 pins NMEA 2000®
- 1x Input 0-4 kHz for RPM (2 inputs with Dual Engine Model)
- 4x Inputs 0-400 Ω (up to 8 inputs with Dual Engine Model)
- 2x Inputs 4-20 mA
- 1x Input 0-5 V (2 inputs with Dual Engine Model)

AFTERMARKET PACKAGE:

EngineBox, Cable Harness, Safety Instructions.

LINK UP GATEWAYS

These single-sensor gateways are designed to upgrade your vessel sensors to NMEA 2000®. Available in 4 different variants: resistive, voltage, LIN and J1939, those can be easily configured through either the embedded NFC interface or NMEA 2000® by means of our Configuration Tool. The ISO 8846:1990 compliance completes the devices by allowing their installation into compartments.

Link UP Gateways

Optional: Wiring Harness A2C1756300001

NAVSENSOR

The multifunctional AcquaLink™ NavSensor offers an inertial sensor with a GNSS receiver module to provide the accurate readings of speed of travel as well as pitch & roll. Compass readings can be displayed electronically thanks to the embedded Fluxgate compass, which also facilitate course corrections in electronic autopilots. The barometer and air temperature sensors are early indicators of forthcoming weather conditions.

- NMEA 2000® certified
- IPX6 extended protection rating
- GPS Module: Position, time, boats vector, signal quality, satellites
- Compass: +/-40° tilt angle, <2° accuracy, alarm (rapid field strength change, tilt angle overrun, undervoltage condition)
- Barometer and air temperature sensor
- Operating temperature range -20°C / +70°C

NAVIGATION KIT AND NAVIGATION KIT PLUS

Complex boats need a smart solution. And we have it. VDO Marine OceanLink™ display is the only product on the market able to interpret CAN, NMEA 2000® and analog signals without any additional external device.

SAFETY, PERFORMANCE, ENTERTAINMENT

VDO Marine Navigation Kit and Navigation Kit Plus is the solution! Our Navigation Kits will become essential crew members which ensure top performance in open seas, even in the most extreme situations.

ALL IN ONE BOX

All you need is in one box including wiring harness and terminators. All products are REACH and RoHS compliant and NMEA 2000® certified.

NAVIGATION KIT AND NAVIGATION KIT PLUS

WIND SENSOR

SAILING KIT

Have your boat ready for the sailing season with the VDO Marine Sailing Kit, the fundamental setting for your sailing boat.

The VDO Marine Sailing Kit brings all the necessary tools for your sailing journeys. All you need is in one box including wiring harness and terminators. All products are REACH, RoHS and NMEA 2000® compliant. The Sailing Kit provides the elementary yet essential set-up to make your sailing trips safe while having access to all necessary information.

The Sailing Kit consists of four devices, namely, one OceanLink™ GPS Speedometer, one wind sensor and two OceanLink™ Navigation gauges, wind angle and wind speed. These products are a must have on a sailing boat and offer a high functionality and readability, thanks to the analog displays. Easy to install, the Sailing Kit provides necessary data to assist you during your journey.

The NMEA 2000® certified GPS Speedometer has an embedded GPS receiver for speed and heading indications, avoiding the need of additional sensors on board. It also serves for calculation of true wind data in combination with the navigation wind gauges featuring an infrared push button for a fast switch from apparent to true wind. The VDO Marine Sailing Kit is low-power consuming and lead-free for our planet's well-being.

SENSORS

Sensors for electronically controlled safety functions are the eyes, ears and antenna of a modern-day high-tech vehicle. Nothing escapes them – neither the smallest temperature deviation inside cooling systems, nor the monitoring of engine and gear oil temperature. Intelligent safety systems

are inconceivable without them. Over the past 60 years, we have continuously refined and perfected our sensors that now have reached an utmost degree of precision.

SUMLOG™ TRANSDUCER

The Sumlog™ Transducer is required to measure boat speed through water. The Sumlog™ includes two paddle wheels, which can be exchanged to match the speed range of the boat, thereby supporting speeds from 0 to 18 or up to 50 knots respective of the installed paddle wheel. The NavBox supports up to two Sumlogs™ which can be directly connected to the dedicated Sumlog™ ports using a 4 pin M12 connector extension cable.

AFTERMARKET PACKAGE:

18 knots Sumlog™ Transducer, additional 50 knots Paddle Wheels, Valve, Plug, 2x Rubber Seal, Installation Instructions, Safety Instructions.

DEEP-PIPE LEVEL SENSORS

The Deep-Pipe Level Sensor is ideal for usage in fuel tanks. Its 38 mm diameter vertical tube contains a float inside, which measures the liquid's level. Small holes at the top and bottom of the tube act as a baffle to fuel sloshing around in the fuel tank, so the float position remains stable at any sea state. The sensors are made in various lengths starting from 150 mm up to 1200 mm – when selecting the sensor, make sure that the length chosen is at least 4 mm from the base of the fuel tank once fitted.

- TE Superseal Connector IP67
- Compensation chamber
- Flange: PA66 GF30
- Wiring harness with length of 200 mm
- 3 Signal ranges: 90–4 Ω , 0–180 Ω , 240–33 Ω ,
- Length: 150 mm – 1200 mm
- Mounting diameter: 54 mm
- IP67 protection rating

6 m Wiring Harness A2C1756300001

FLANGE ADAPTER KIT

Small but necessary instrument that will save your money and time. The Flange Adapter Kit can be adapted to our brand-new Fuel Level Sensor replacing the old 80 mm sensor. A cross reference list (provided by our sales offices) will allow you to find the correct sensor replacing the defective one. Our Flange can be adapted to any of our liquid level sensors.

This is a complete solution in case of defective Fuel Level Sensors.

Waste Water Capacitive Sensor

AMMETER SHUNT

A shunt is a resistor that causes a small voltage drop. This voltage drop in mVolt is proportional with the current in ampere that goes through the resistor. This voltage is measured by the Ammeter. The advantage of the shunt is that thick wires are no longer needed at a high current (>10 A).

To measure the total flow you only need two thin wires from the measuring instrument to the shunt in the earth connection of the main system.

Ammeter Shunt

RANGE	VOLTAGE	INPUT	ARTICLE NUMBER
-60/+60 A	12-24 V	60 mV	A2C59514043
-150/+150 A	12-24 V	60 mV	A2C59514047

ELECTRONIC PRESSURE SENSORS

The active pressure sensors with voltage output are used to measure pressure of gaseous and liquid media in a variety of applications at various locations.

The pressure sensor unit is based on a stainless steel sensing element and converts fluctuations of measuring medium into a pressure proportional electrical output signal (0.5 – 4.5 V).

RANGE	VOLTAGE	THREAD	ARTICLE NUMBER
10 bar / 150 psi	12-24 V	M12 x 1.5	365-100-010-121K
16 bar / 232 psi	12-24 V	M12 x 1.5	365-100-016-121K
30 bar / 435 psi	12-24 V	M12 x 1.5	365-100-030-121K

Electronic pressure sensor with voltage output

NOTE:

Tightening Torque depends on threaded port size and sensor body material.

Connector type: Bayonet according to ISO15170 (formerly DIN 72585).

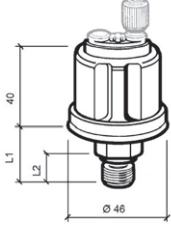

The Electronic Pressure Sensors are compatible with ViewLine Pressure 52 mm gauges:

RANGE	VOLTAGE	COLOR	INPUT	ARTICLE NUMBER
Ø 52 MM
