Sharper Accuracy. Higher Durability. Advanced Technology.

The EG21 Series Electric Gage and the EGS21 Series Switchgage instrument take the electric gage to new heights with proven state of the art technology and reliability.

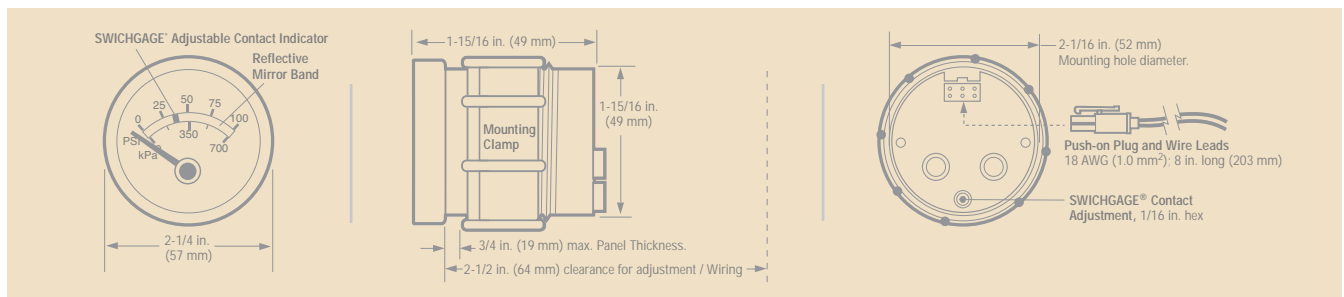

- ▼ EG Air Core movement design
- ▼ Technological improvements in lighting, accuracy in reading and wiring installation
- ▼ Assurance of highest reliability and service
- ▼ Environmentally sealed design
- ▼ Exceeds the rigid SAE J1810 standard
- ▼ Corrosion-resistant materials.
- ▼ Desirable for marine and other environmentally sensitive applications
- ▼ Soft, non-glare dial and pointer illumination by "cold light" LED.

Electric Switchgage instrument

The EGS21 Series Switchgage instrument has all of the features of the EG21 Series Gage plus an adjustable set point PowerHall® Effect switch output for operating alarms or equipment shutdown. The trip point is adjustable over 90% of the scale and has a set point indicator visible from the gage face. Now you can have both, the ease of electric gage installation and the reliable switching of Murphy's famous Switchgage instrument.

Case: Polyester (PBT), impact and weather resistant with screw-on mounting clamp.

Bezel: Polished 316 stainless steel standard; available in black. SAE style optional.

Lens: Clear Polycarbonate and UV stabilized.

Air Core Movement: Silicon dampened pointer.

Dial: Black with white markings; back-lite (marking becomes red when illuminated); dual scale with mirror band to reduce parallax reading errors.

Switchgage instrument Sensor: PowerHall® Effect; outputs ground signal (sinking output) rated: 300 mA continuous (EGS21 models). Pressure, Fuel, Volts set on decreasing scale. Temperature and Amps set on increasing scale. Output saturation voltage (voltage drop across switch): 1.3-2.3 Volts @ 25°C (may require some conditioning to work with logic inputs)

Switchgage instrument Set Point Indicator: Visible on mirror band (scale); adjustable from the back of the unit (1/16 in. hex type wrench).

Wiring: Plug connector with wire leads, 18 AWG (1.0 mm²), 8 in. (203 mm) long.

Operating Temperature: -40 to 185°F (-40 to +85°C).

Storage Temperature: -77 to 185°F (-60 to 85°C).

Over Voltage (Gage Movement): Withstands 200% of nominal system voltage for 5 min. Meets SAE J1810.

Reversed Polarity (Gage Movement): Withstands reversed battery terminal polarity indefinitely within operating temperatures.

Environment and Test: Meets SAE J1810 standards.
