VDO ViewLine to VDO SingleViu Cross Reference

VDO ViewLine analogue gauges are now obsolete. Howard Instruments recommends the **VDO SingleViu** range (black dial, through-dial lighting, 12/24 volt) as the replacement. Black and white ViewLine gauges are both replaced by the black SingleViu gauge listed. 85mm ViewLine gauges are replaced by 80mm SingleViu and 110mm by 100mm, and there is no 52mm SingleViu tachometer, so check the panel cut-out where the size changes. Click a SingleViu part number to open it on our website.
Where no direct equivalent is shown, please contact us on **03 9457 4755** or info@howardinstruments.com.au and we will recommend the best option.
